11:00~15:00
KAIST Tour & Lunch

15:00~18:00
Daedeok Science
Complex Tour

18:00~23:00
Banquet & Transfer

Today's Menu

KAIST Tour

Drone flying & racing contest was held during the Science Competition today. Participants had extra times to meet their teammates and practice operating the drones since the first day of KSASF. Although a lot of participants have not dealt with drones before, they quickly got used to the drones and enjoyed the activity. The winner of the contest was Team SC-02, and the sole winner of Drone Racing was Sirapop Nithiuthai.

Academic Lectures

After lunch, students had the opportunity to take part in academic lectures given by KAIST and KSA professors. The lectures were on a wide range of subjects, from wearable computer to Korean pop culture. Special guests were also invited for the event: prof. YOU Hoi-jun and prof. PARK Inkyu from KAIST, and Mr. NA Junggeol (KSA graduate) were there to give students inspiring lectures.

Korean Spirit & Culture

Last night, participants learned about Korean culture and history throughout the Korean Spirit & Culture program. The participants wore Hanbok (Korean traditional clothes), watched videos, and tried some Korean traditional desserts. Andrei Eremchenko from MCL commented that he especially liked the film and Korean desserts were very special. It was a meaningful night for both Korean and foreign participants.

Scientific Inquiry
